# Table of Contents

List of Abbreviations, Acronyms & Terms ........................................ iii

Executive Summary ........................................................................... v

Introduction ......................................................................................... 1

Summary of Existing Commercial Processes ..................................... 6

Technologies Not Included in Report ................................................. 14

Discussion for Each Process ............................................................... 15

## Partial Upgrading Processes

1. Aquaconversion® Process by PDVSA ........................................... 18
2. Catalytic Crude Upgrading (CCU) Process by UOP ...................... 26
3. CPJ Process by Wesco Energy Corp. ........................................... 34
4. EADIEMAC Process by Eadie Oil Inc. ......................................... 43
5. FTCrude® Process by Expander Energy Inc. ............................... 49
6. HI-Q® Process by MEG Energy .................................................. 62
7. HTL® Process by Ivanhoe Energy Inc. ......................................... 74
8. H-Oil® Process by Axens North America ..................................... 87
9. IYQ Process by ETX Systems Inc. .............................................. 96
10. JetShear™ Process by Fractal Systems Inc. ................................. 106
11. PetroBeam Process by PetroBeam, Inc. ........................................ 115
12. Petrosonic Heavy Oil Process by Petrosonic Energy Inc. .............. 124
13. Sonocracking™ Process by SulphCo ........................................... 137
14. TRU Process by Rival Technologies Inc. ...................................... 147
15. Value Creation Technology by Value Creation Group
16. Viscositor by FluidOil Ltd.
17. Wildcatter HCU by Refinery Science
18. WRITE Process by the Western Research Institute

Full Upgrading Processes

1. Chattanooga Process by Chattanooga Corp
2. GHU® Process by Genoil
3. Eni Slurry Technology (EST) by Eni S.p.A.
4. HCAT® Process by Headwaters Technology Innovation
5. HRH® Process by RIPI (Iran)
6. OrCrude™ Process by CNOOC
7. Uniflex™ Process by UOP
8. Veba Combi- Cracking™ (VCC™) by BP and KBR
9. VRSH™ Process by Chevron
